NEWS

ENNES WORKSHOP

**Mark your calendar for
the El Paso Ennes Work-
shop on Thursday, May 26!**

Planned presentations -

Blown Optic Fiber Technology

Brad Pope, General Cable Broadcast Solutions

Blown optical fiber is a method to future-proof a broadcast network infrastructure. Whether building a new or retrofitting existing facilities, blown optical fiber technology provides flexibility in network design.

Intro to Dialight LED FAA Obstruction Lighting Solutions for Broadcast Towers

Tom Amador, Dialight

Broadcasters will learn about LED technology for broadcast towers, Dialight's LED technology, FAA compliance, the LED value add, and Dialight tower lighting retrofit success stories.

Leveraging Live Broadcast Content on OTT Services

Andrew Sachs, Volicon

This presentation will explore a scalable and cost-effective solution for generating premium content for OTT services by describing a model for continuous and frame-accurate content capture.

Building your IP Network

Benton Cook, DoubleRadius

Build your IP network to your transmitter sites without leased lines. Build a network on reliability without monthly fees. We will introduce two new solutions that could and will change the way broadcasters get IP to their last link.

Digital Audio Processing Technology Improvement for Radio and TV

Brian Kerkan, Telos

This presentation will discuss the technical standards, design considerations, and audio processing features available on modern broadcast processing.

Stream Like You Mean It!

John Bisset, Telos

What are the ins and outs of streaming? How has streaming evolved from "just a computer?" What about processing? What's the most cost-effective and efficient way to stream for a cluster of stations?
